Carton dimensions	2615 × 613 × 16 mm
Edge system	Groove profile on 2 sides
Intended use	Interior walls

Illustrative outline.
Section enlarged for clarity.

CONSTRUCTION

SPC core + decorative film + UV coating. The decorative face provides the selected finish.

FITTING

Prepare a smooth, clean wall. Use a compatible neutral nail-free adhesive and suitable finishing trims. Confirm the substrate, adhesive and edge requirements before fitting.

CARE

Wipe with a damp cloth or mild cleaner. Check the cleaner's compatibility with the selected finish.

COVERAGE & PLANNING

Coverage is nominal, before cuts and waste. Calculate the panel quantity from the project layout, including cutting losses.

CONFIRM YOUR FINISH

Approve colour, texture and sheen with a physical sample before ordering. Screens and printing can alter the appearance of a finish.

Nominal supplier specifications. Installation requirements depend on the wall, adhesive and chosen finish. Use this sheet with the project planning guide.
